

Dear Hiring Team,

I'm excited to apply for the Software Engineer II – Full Stack role at Ad Hoc. I've spent the last several years building full-stack applications for federal and DoD environments, working with React, Angular, TypeScript, .NET/EF Core, SQL/PostgreSQL, and Python services. My experience includes developing user-facing features, designing and optimizing backend APIs, improving CI/CD pipelines, and supporting secure authentication workflows. I'm comfortable debugging production issues, collaborating with cross-functional teams, and delivering reliable features in mission-driven environments.

I'm drawn to Ad Hoc's focus on improving digital services for Veterans and the public, and I appreciate your emphasis on human-centered, accessible, and modern engineering practices. I would welcome the opportunity to bring my full-stack development experience to your team and contribute to meaningful, impactful government technology.

Sincerely, Jorge Ramirez
